## DPS SERIES CONDENSATE REMOVAL UNITS

The DPS series condensate removal units are used in applications with high condensate content where the dew point of the sample gas needs to be reduced prior to a gas cooler or conditioning device.

It is ideal for use in applications where a gas cooler is unavailable or when the inlet dew point of the sample gas is too great for the cooler to work. The unit is corrosive resistant to most chemicals and is delivered with wall mounting clamps and fittings.

### FEATURES

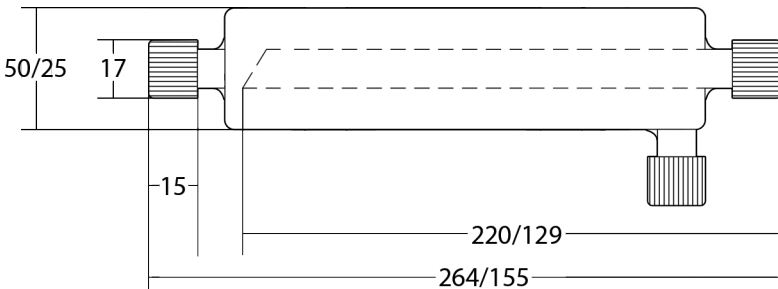

- Safe condensate removal
- Reduces dew point by up to 30 °C
- Ideal for high moisture applications
- Highly reliable
- Helps to prevent droplets in the measured gas stream
